

Sprint planning 5

During the fifth sprint planning meeting, we decided to do following tasks:

1. Indoors view paint a map for "Edithuset"
2. Put out directions of the way between users location and target
3. Making alert dialog appear on hold down
4. When pressing a building the alert dialog should have a button "new destination"
5. Test create a project and connect it to our app
6. Create a setting view change language and map view satellite and street view
7. Architecture specification, developer guide
8. User guide
9. Definition-of-Done
10. User stories
11. Acceptance test + report table
12. Make indoor views for each building

Tomas and Marcus will set up a test project and connect to our app. Marcus will also update the acceptance tests. Tomas will update definition of done and user storie. He will also do the testing along with Henrik. Henrik will start with a indoors paint map of edithuset and then make indoorviews for each building and make them connect to the BuildingOverlays. Anton will do the user guide, make the aler dialog appear on hold down and place out directions of the way.
