Release notice with known bugs and limitation

Features:

- Toggle map/satellite view
- Show the users current location
- Pin point destination
- Choose classroom from a list or browse classrooms from mapview
- All major entrances for "EDIT huset" implemented
- Enter "EDIT huset" with a sample mock up view
- Swipe between the different floors in the indoor view
- Pressing the browse button focuses the map view over Chalmers

Limitations:

- When choosing a classroom the classroom is not showed in map view
- The indoor view is just a sample (the real one is not created yet)
- Few classrooms exists in database (not implemented yet)
- Can´t get the direction between current location and target rendered in map view.

Known bugs:

- Pin point destination can´t be removed without changing new destination
- If you choose a new "pin point" destination the old one still exists (should be removed)
