Sprint planning 1

During the first scrum-meeting we decided four different task to do during the week. The tasks follows:

1. Making mock up for CTHMaps Android
2. Set up git for each computer
3. Set up google Maps View
4. implement dummy GUI in eclipse

We decided that Tomas and Anton should do task one and estimated 3 hours for this task. Everyone should do task 2 and we estimated 4 hours.
Henrik and Anton should do some research on how to implement the Google Maps-API and then start with task 3, which was estimated to 5 hours.
Everyone should do task four and we estimated 8 hours for this.

Here are the mock-ups:
